GICIB2025prospect:

Guangzhou is vigorously promoting the construction of "High-Quality Housing" with the industrialization concept of "building houses like manufacturing cars", aiming to establish itself as a national leader in this field. As the core engine of the Guangdong- Hong Kong-Macao Greater Bay Area, Guangzhou has incorporated "intelligent construction and industrialized buildings" into its "12218" modern industrial system for key development. Leveraging the advantages of industrial clusters and policy incentives, it is accelerating the establishment of new quality productive forces in the construction industry. In 2024, the total output value of Guangzhou's construction industry reached 881.69 billion yuan, with a year-on-year growth of 7.5%. The intelligent construction pilot project was commended by the Ministry of Housing and Urban-Rural Development. Against this backdrop, the first Guangzhou International Intelligent Construction and Industrialized Building Industry Expo (GICIB) emerged in 2025. During the exhibition, the Green Building Expo, Housing Industry Expo, and Steel Structure Expo, will be held concurrently. It aims to become the largest and highest-level industry event in the construction field during the Guangzhou Canton Fair period, promoting the "Chinese Construction" to enter the "Innovation Era"!

Digital and Intelligent Construction, Leading the Industry

Focusing on smart construction innovation across the entire "Design-Production-Construction-Operation" value chain, the exhibition comprehensively covers three key sectors: Industrialized Building Construction, Intelligent Infrastructure Development, Digital Home Solutions.

Serving as a one-stop platform for: Technology commercialization, Industry standard co-creation, Global solution exporting.
