

ABOUT GROWZWELL

Growzwell comprises a conglomerate operating across various sectors including Industry, Agriculture, and Services.

With a legacy spanning over 40 years, **Growzwell** has spearheaded diverse projects across multiple domains, from manufacturing plastic parts for automotive giants like Fiat and Renault to revitalizing palm groves (Mejhouli, Bouzekri) and venturing into home furniture, distribution, logistics, and the food industry.

Committed to sustainable development and innovation, **Growzwell** continually enhances technical excellence and client satisfaction.

Industry

GROWZWELL legacy began in 1971 when IFRIQUIA PLASTIC was founded by Haj Ali GACIMI (peace to his soul), marking our entry into the plastics industry. Over the years, we have strategically diversified our operations, establishing state-of-the-art production units for foam, mattresses, and beds, as well as specialized facilities in the agri-food industry.

Agriculture

Since the early 1990s, the **GROWZWELL** Group has actively contributed to the agricultural sector, aiming to support its development. Our production includes a diverse range of products such as citrus fruits, berries, almonds, and "Medjhouli" dates, with a primary focus on export markets.

Services

To meet the logistics and IT demands of our companies, we founded MEGASYS. We also established additional service companies to further support our expansion and development.

SODIFLEX was created in 1994 following the acquisition of the company SODEPI, one of the pioneers in the production of flexible and rigid foam in Morocco.

SODIFLEX produces different types of foam:

- high resilience HRF foam
- memory foam
- technical foam,
- rigid foam ...

The "**Mejhoul**" date is one of the best varieties due to its quality and unique taste. **GROWZWELL** aimed to preserve and improve this national wealth. **BOUROUK TAFILALET** is a 300 Ha farm in the Errachidia region southeast of **Morocco**.

Agriculture sector companies

Located in Sidi Yahya Gharb, Kenitra province, **ISSEMGHY HOUSE** is a 100 Ha farm for the cultivation of seedless mandarins.

In line with the dynamic generated by the royal desire for sustainable development in the agricultural sector, **ISSEMGHY BIOTECHNOLOGIES** was born out of the Group's wish to work for the reconstitution of the palm grove and the multiplication of more resistant and more productive noble species.

Agriculture sector companies

To meet the demands of our customers for quality citrus fruits, **MED AZUR** production projected for 2024.

Located in the region of Sidi Slimane, the farm with an area of 240 ha is entirely dedicated to the production of citrus fruits.

In 2016 **PRIM BERRY** was created in the Moulay Bouselham region.

Covering an area of 44 ha, the farm produces blueberries and raspberries for the export market.

ORIENTAL ALMONDS company was created in **2018** in Guercif east of Morocco.

Covering an area of 100 Ha, the farm is dedicated to the production of almonds.

MEGASY'S was created in 1999 in Casablanca.

The company specializes in information systems, telecommunication networks, internet, intranet, access control and network security.

MEGASY'S has been able, through more than 20 years of existence, to acquire a know-how recognized by our customers and partners, both national and international.

Services sector companies

GACIDIS was created in 2020 in Casablanca.

The company is specialized in the distribution of consumer products (food and non-food).

GACIDIS is present in 8 regions through 7500 points of sales and supplies various wholesalers and distributors throughout the kingdom.
