Our company

Synergy Harvest Lab

Synergy Harvest Lab, is a Costa Rican company that was born under the legal framework approved by the Costa Rican government, which has all the licenses to develop those activities covered by the state hemp laws, both for medicinal and therapeutic use and for food and industrial use, thus complying with the requirements and regulations expressly contained in both the law and its implementing regulations.

Mission

We are a company dedicated to the revitalization of the local and regional economic sector in the area of influence of the project. We promote the cultivation of industrial hemp as a profitable substitute with a positive environmental impact. Its characteristics as a soil regeneration plant make it an attractive option, all in compliance with the legal requirements of Law 10113 of Costa Rica.

Vision

To be a reference, contributing with a solution to Costa Rican policies within the framework of a circular economy, focused on the 'Environmental Footprint', using natural raw materials.

Projections

We believe in the importance of caring for our planet and encouraging others to do the same. We are working to reduce our environmental footprint through energy and water conservation, recycling and green building.

Community engagement: for economic activation through hemp cultivation, we believe in fostering thriving communities.

Unleashing the power of cannabis to improve lives: from boosting personal health and wellness to creating economic opportunity and engaging in social justice initiatives, Synergy Harvest Lab is the project designed to showcase the potential of cannabis as a positive force for change. As a purpose-driven company, we believe we have a responsibility to lead by example and create a fair and equitable industry in which we aspire to operate.

Our projections drive us to face challenges, live our ideals and strive for the meaningful changes we know are possible. With a focus based on our responsibility: using cannabis to build a better world, inspiring our team members and society, we are committed to achieving our goals hand in hand with farmers and state laws.

Giving back to society through assistance, research and scholarships funded by our profits, carrying out social work with universities and government agencies. Empowering collaboration with state agencies strengthens this project, backed by the technical expertise and processes developed during its execution.

Our values

Innovation

We are committed to exploring new technologies and methods to improve our products and processes.

Integrity

We act ethically in all our decisions and operations, ensuring that our actions reflect our values and principles.

Excellence

We strive to achieve the highest standards in everything we do, continually seeking improvement and innovation in our products and services.

Respect

We believe in the intrinsic value of every individual and in the care of the environment.
We encourage relationships based on empathy and mutual understanding.

Diversity and inclusion

Promote a diverse work environment where different perspectives and experiences are valued.

Mentoring

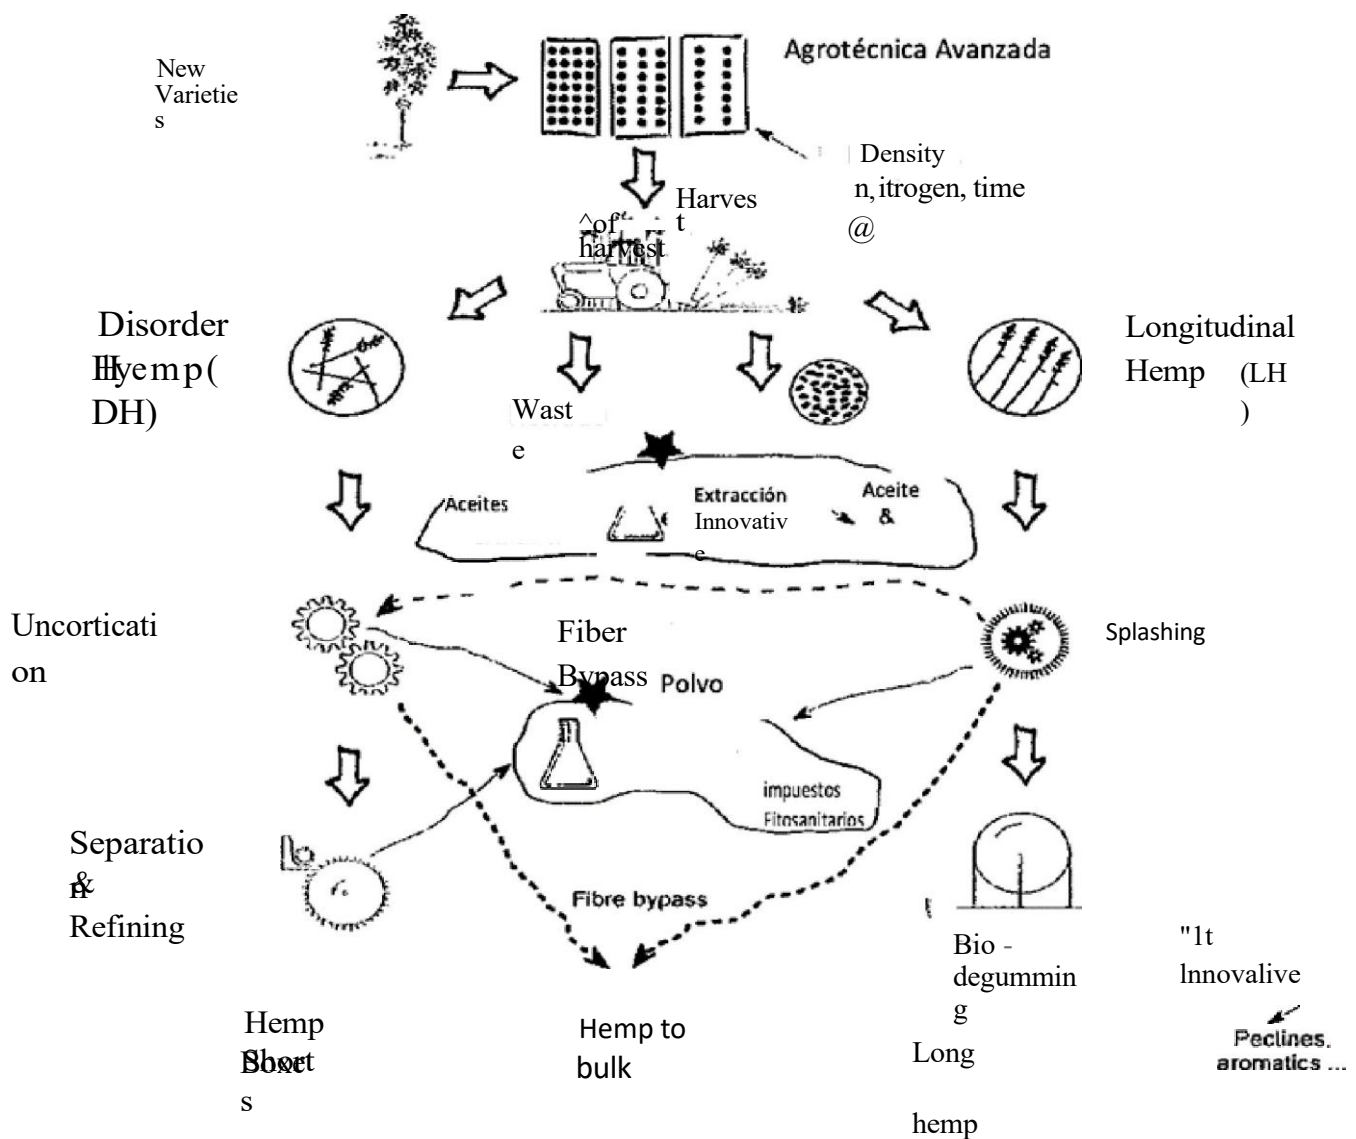

Encourage the development of new talent through mentoring and professional support programs.
