GANLBT

Generative AI Natural Language Brain Technology

Generative AI Natural Language Brain Technology (GANLBT)

is the name we give to this innovation

GANLBT WILL BE

With its extendable conversational Generative AI Natural Language Brain Technology (GANLBT), SIMPLYLOOSE is the only market-leading NLP/NLU platform that is revolutionising how customers interact with health experts.

TECHNOLOGY BY:  Simply Loose

AUTOMATE

Nutrition Coaching with Neural AI Technology

Generative AI Natural Language Brain Technology (GANLBT)

broader general knowledge and problem-solving skills enable it to solve complex problems and Identifying, Analysing, and give Recommendation at right time.

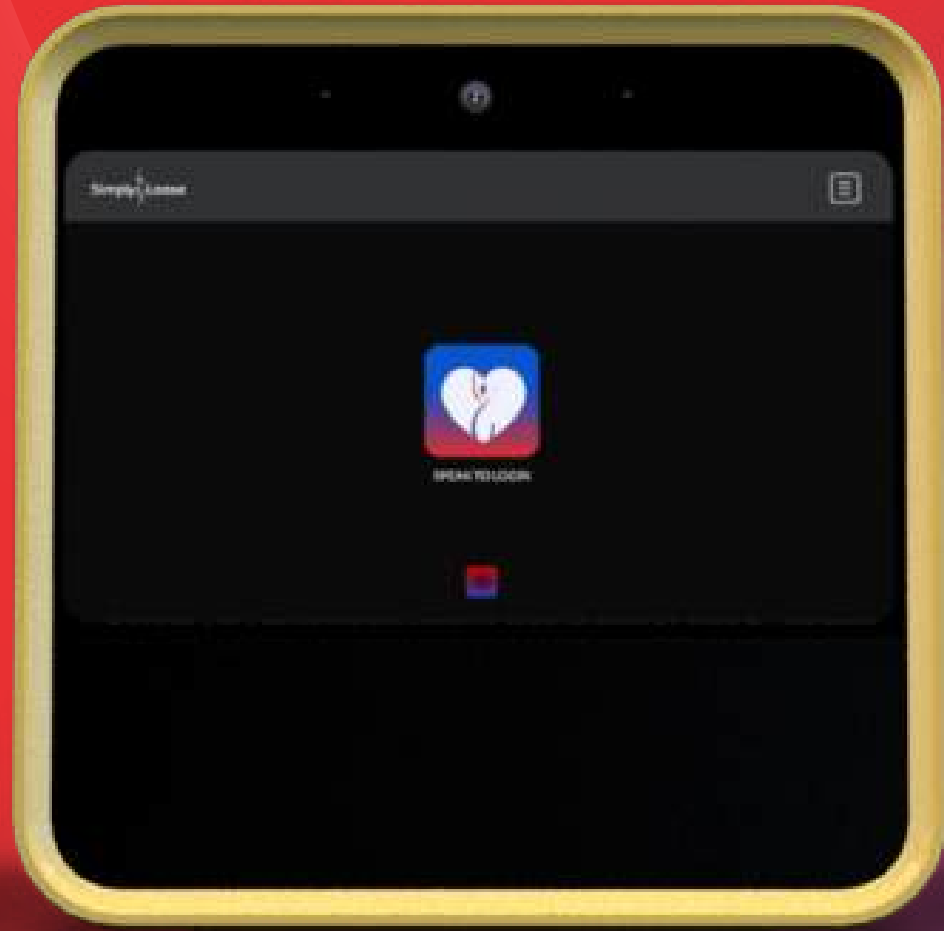

TRACK YOUR CLIENTS' NUTRITION
PROVIDE AI AUTOMATED RECOMMENDATIONS
AI ANSWER THEIR FREQUENT QUESTIONS

WHY KANATA

It's the ultimate device for a healthy life.

PRIVACY WITH KANATA

AI HEALTH TRACKER

REIMAGINE CARE

REAL-TIME MONITORING

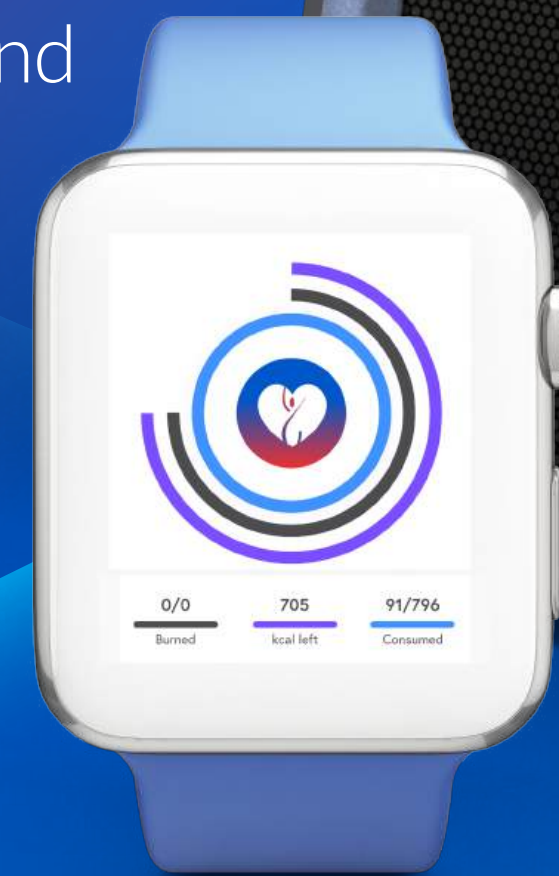

IT'S THE FITNESS

that fits and sync from your anywhere.

Sync with Simplyloose App from multiple devices with Neural AI Technology

Move. Exercise. Sit. Track all the ways you're active.

Your everyday activity is shown via activity rings. Make it a daily objective to shut them. There are prizes, individualised coaching, and activity competitions to keep you inspired.

REAL-TIME MONITORING

Take charge of your health with us

It's always looking out for you. Neural AI Technology

Real-Time Monitoring of Glucose Monitoring, HeartRate, Blood oxygen, ECG, Temperature Sensoring, Emergency services when you need them.

AI-Based Neural Calling System on Emergency with your health data-points.

DESIGNED & DEVELOPED IN CANADA

With **SIMPLYLOOSE COIN**, you may unlock Diabetes and Obesity.

Discover special health and fitness opportunities in the market and unlock secret rewards, or interact with other patients. Use your COIN to purchase innovative digital assets, pharmaceuticals, insurance, and more.

As the world's digital security falls, we made the decision to begin coding our platform and creating our SIMPLYLOOSE COIN using Blockchain Technology. We'll use blockchain technology to secure the clients' data. We'll be giving and sharing our money to encourage individuals to maintain their physical fitness. Therefore, we will be dispensing our coins on a daily basis using our technology.

PRIVACY AND SECURITY

Our new **VOICEID as Autheniction AI Technology** will be combine installing and administering our platform on the BlackBerry Dynamics platform because privacy is the most crucial component in the modern digital age.

The BlackBerry Dynamics platform, one of BlackBerry's corporate software products and services, provides a secure and scalable platform for creating and deploying healthcare apps. These platforms' characteristics, which are essential for healthcare apps that handle private patient data, include safe communication, encryption of data, and access control.
