

SYNTHETIC FOOTWEAR ADHESIVES

PU - 2009

PU - 2012

PU - 2032

These three products are footwear adhesives which are used in footwear / shoe / leather industry. After complete setting, it develops a bond between two surfaces which is tough, flexible and resistant to oil, alkali water, petrol etc.

GLUVICOL SPRAY

It is a rubber based adhesive for use in foam-to-foam applications, bonding foam to foam, rubber to foam, foam to wood, foam to metal, and foam to upholstery. The unique advantage is that it gives a soft feel to the joined surfaces. It is non-staining and does not discolor tapestry. It is economical to use. It is quick drying and gives good coverage.

GLUVICOL - SMART

GLUVICOL WOOD GLUE - SMART

It is a synthetic resin based adhesive having vast applications in wood-working / furniture industry, handicrafts, paper and paper products, textiles and other allied industries and also for domestic household applications. It gives bonding for wood to wood, wood to laminate sheets, and other multiple surfaces. It is economical in long run.

GLUVICOL WOOD GLUE - M

It is milky white aqueous poly vinyl acetate dispersion with cross linking properties. Ideal for area exposed to moisture and humidity like bathrooms, kitchens, ship building and coastal areas.

The dispersion exhibits a rapid increase in bond strength when pressed at temperature higher than 20°C. The resulting water proof bond exhibit an outstanding heat and water resistance, 3 to 4 hours setting time. More coverage with super strong bonding.

GLUVICOL WOOD GLUE - M

GLUVICOL WOOD GLUE D3

GLUVICOL WOOD GLUE conforms the D3 (BS.EN.204) standards of Europe.

GLUVICOL WOOD GLUE D3

GLUVICOL WOOD GLUE D3 is one of the most premium and saleable product of GPL.

It is an aqueous polyvinyl acetate dispersion with cross linking properties and stabilization with polyvinyl alcohol. It is qualified for water resistant and heat resistant wood glue.

GLUVICOL WOOD GLUE on hot press application shows accelerated increase of bond strength, making it most suitable for the short contact lamination of panels with laminate sheet finishing and for best forming finishes of panel edges and profiles.

It also gives excellent bonding strength to wood joining. It's bond exhibits an outstanding heat and water resistant.

GLUVICOL EXCELLENT D3+

GLUVICOL EXCELLENT D3+

is one of the most premium and saleable product of GPL. It is an aqueous polyvinyl acetate dispersion with cross linking properties and stabilization with polyvinyl alcohol. It is qualified for water resistant and heat resistant wood glue.

on hot press application shows accelerated increase of bond strength, making it most suitable for the short contact lamination of panels with laminate sheet finishing and for best forming finishes of panel edges and profiles. It also gives excellent bonding strength to wood joining. It's bond exhibits an outstanding heat and water resistant.

GLUVICOL HEATPRO+

It is a synthetic rubber based adhesive for use in foam-to-foam applications, furniture and footwear industries. The unique advantage is that it gives a soft feel to the joined surfaces. This can also be used in upholstery and fixing laminate sheets to wood and other surfaces. It is non-staining and does not discolour tapestry. It is economical to use. It is quick drying and gives good coverage.

These three products are rubberbased adhesives which are used in foam-to-foam applications, footwear industry, handicraft industry and carpet industry.

The unique advantage is that the seproducts give as offfeel to the joint surfaces. These products are non - staining and does not discolor tapestry. They are economical to use and gives a good coverage. We also provide sprayable Adhesives.
