Cleaner Air, Healthier Living with Greentech

About Us

Whether it's your home or commercial business, the air you breathe is crucial for your well-being. Our filters are the only ones available that can eliminate odours and volatile organic compounds (VOCs) at the molecular level, providing you with fresh and pure air. Invest in your health today with Greentech Filters+ and experience the difference for yourself.

Greentech History

Our History

Allen Johnston, Founder and CEO of GreenTech Environmental, who started the company to create eco-friendly products that enhance health and quality of life. Allen's personal mission is to improve indoor air quality around the world, and he brings years of experience from his previous positions at Hughes Aircraft and Raytheon Missile Systems. Since its launch in 2009, GreenTech has expanded its product line to include over 50 diverse products, distributed across 20 countries worldwide. From its origins with purePower, a home energy management solution, to the introduction of the GT3000 air purifier in 2010 and the creation of the pureHeat and pureWash lines, GreenTech has grown to offer a wide range of high-quality products that address unique human needs. As the company moves forward, it continues to create a cleaner world for every family and every home.
